### Instrument List:

- [Green](#)

Discussion:

All APUs should be collecting data. Due to the lack of sunny days, battery voltages have dropped but remain stable for now.

APU 02, 03, and 04 data flow should now be online. However, the VZW LTE network is proving to not be not very robust.

APU01 is scheduled to be installed at the 2DVD\_SN25 location on Thursday (wx permitting).
